### **1. Title :**

**" Paradise - Tours & Travels"**

### **2. Aim/Objectives :**

The aim of our website is to assist tourists in reaching their desired destinations in India, whether they are in the north or south. Flight and hotel reservations are also part of our service. We provide tourists with cost-effective packages.

### **3. Abstract :**

The project "**Paradise - Tours & Travels**" is a web-based application. This application allows users to book low-cost flights, hotels, and tour packages online for a variety of destinations. Users can log in and book tickets online using this application. Users may also provide feedback in the form of comments and ratings using this application. Only registered users are allowed to link to the server, and all new registrations will be processed at our office.

### **4. Technologies used(Same as synopsis) :**

HTML5 , CSS , JAVASCRIPT, PHP, MY SQL

### **5. Algorithm:**

- **START**
- **Step-1:**

We must first login to our website using our offline registered credentials from the login tab.

- **Step-2:**

After logging in, you can access the homepage, which includes information about our CEO, business, and gallery.

They can also see some navigation bar on the homepage's top right corner.

- **Step-3:**

The user can choose to go to the following pages based on their requirements.

#### **1) Services Page :**

The user can use this page to book flights or accommodation on the available dates.

## 2) Packages Page:

They can view the list of the various packages and book them on this page.

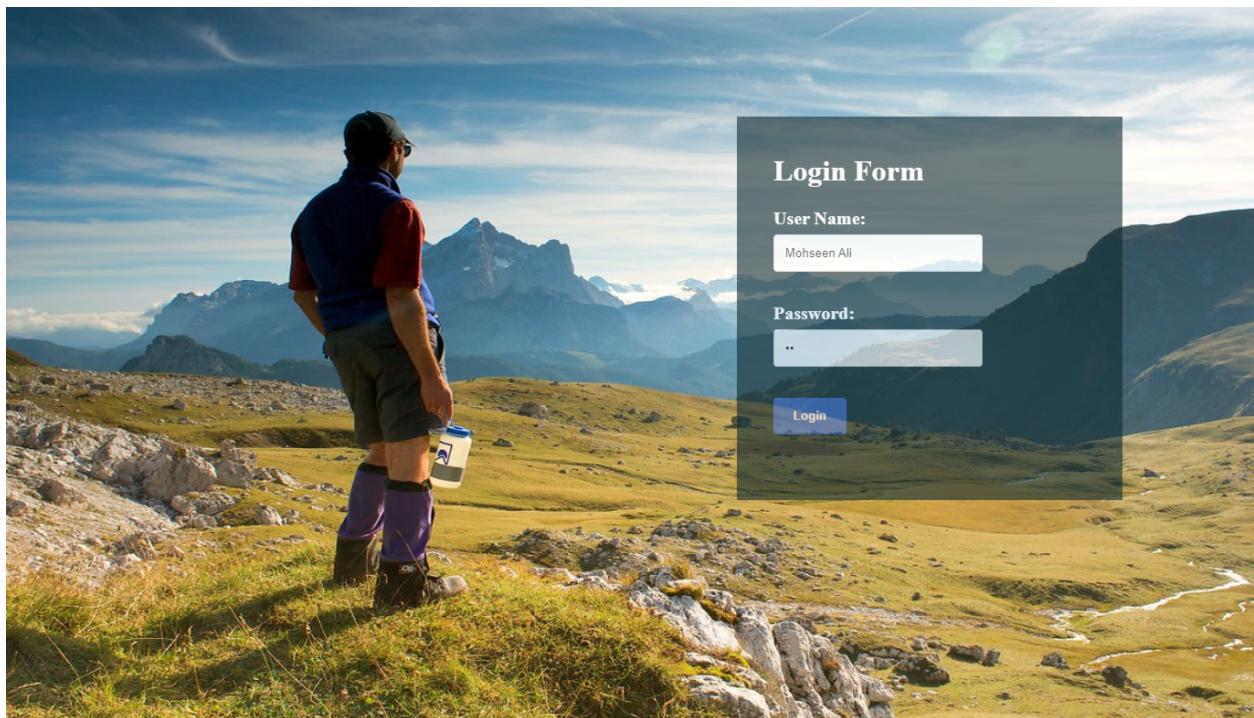

- **Step 4:**

After completing the booking, the user has the option of going to the contact page and filling out the feedback form. They can get in contact with using the information on the contact page.

- **STOP**

## 6. Sample input and output:

### Login Page(input):

## Login Page(Output) / Home Page(Input) :

The screenshot shows the homepage of the Paradise Travel website. At the top, there's a navigation bar with links for Home, Services, Packages, and Contact. Below the navigation is a large banner image of a tropical beach with palm trees and a small hut. To the left of the banner, there's a "About Us" section with text and a small image of a person. To the right of the banner, there's a profile section for Ritesh Agarwal, showing his photo, title (CEO & Founder, University of London), and social media links. Below these sections is a "Gallery" section featuring a grid of 16 images showcasing various travel destinations like beaches, temples, and historical buildings. At the bottom of the page is a dark footer bar with social media icons.

## Home Page (Output):

### Services Page:

The screenshot shows the services page of the Paradise Travel website. The top features a banner with the text "We Make Trips Possible" and "Search our lowest fares to your favourite destination". Below the banner is a search bar with tabs for "Flights" and "Hotels". The main content area has a background image of a tropical beach with palm trees and deck chairs. At the bottom of the page is a "Our Customer Reviews" section displaying five review cards with names and star ratings. A dark footer bar with social media icons is at the very bottom.

### 7. End User:

Someone who wants to travel or visit around south and north India for the least amount of money, they can take advantage of our services (flights, hotels booking) and packages to have a nice time on their journey.

Our website services, such as flight and hotel reservations, can help you buy your desired travel, tickets and accommodation at your fingertips.

### 8. Conclusion:

We've created a travel website that allows users to book packages or tickets to their favourite destinations directly from their preferred locations. We developed a login framework for our users without risking their privacy. By soliciting feedback from our customers, we are continually striving to change. Finally, our main goal is to offer happy and helpful services to customers.
